REQUEST TO WITHDRAW ERRONEOUS HOLDING OF ABANDONMENT

February 13, 2009

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Commissioner:

Applicant respectfully requests that the Office withdraw its erroneous holding of abandonment in the captioned patent application.

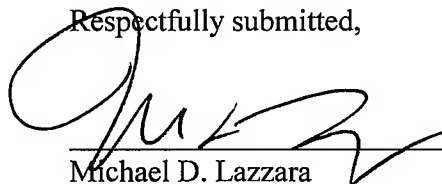

A non-final Office Action was issued for the application on June 16, 2008 (a copy of the Office Action is attached as Exhibit A), and the statutory six-month due date for responding to the Office Action was December 16, 2008. Applicant's undersigned representative filed a timely response to the Office Action with a proper three-month extension of time on December 16, 2008, as evidenced by the attached Electronic Acknowledgement Receipt (see Exhibit B). In addition, a printed copy of the "Bibliographic Data" tab from the PAIR entry for the application is attached (see Exhibit C), which provides further proof that the Office Action was timely filed on December 16, 2008.

Due to an apparent error by the Office, Applicant has received a Notice of Abandonment with a mailing date of January 26, 2009 for the application (see Exhibit D). The Notice indicates that the application is considered to be abandoned because of, “[a]pplicant’s failure to timely file a proper reply to the Office letter mailed on June 13, 2008.” Applicant respectfully submits that no such “letter” or other action was mailed by the Office on June 13, 2008. In fact, no mailing at all is indicated on June 13, 2008, for the application. As evidence of this, a printed copy of the “Transaction History” tab from the PAIR entry for the application is attached as Exhibit E.

In addition, in a January 30, 2009 telephone call between Primary Examiner Romain Jeanty and the office of Applicant’s undersigned representative, Examiner Jeanty acknowledged that the Notice of Abandonment had been issued erroneously. Examiner Jeanty recommended submission of the present Request as a means to remedy the erroneous holding of abandonment.

Withdrawal of the erroneous holding of abandonment is therefore respectfully requested for the application. Any questions regarding the present response are invited to the attention of the undersigned representative by telephone.

Respectfully submitted,

Michael D. Lazzara

DETAILED ACTION

1. This Non-Final Office action is in response to the communication received on March 28, 2008.

Election/Restrictions

2. Applicant's election without traverse of claims 1-117 in the reply filed on March 28, 2008 is acknowledged.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on November 20, 2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 115-117 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 115-117, the claims do not appear to satisfy or to be within any of the statutory classes of invention, namely a useful process, machine, manufacture, or composition of

matter, or any new and useful improvement thereof. Thus, the claims do not tied with a computer system for performing any functions.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-114 are rejected under 35 U.S.C. 101 as drawn to a non-statutory subject matter. The claims (or at least independent claims 1 and 68) are related to mental processes, which is not patentable. Indeed, the claims (e.g. claim 1) recite a (mental) process, which is not tied to another statutory class or does not change or switch statutory class (such as a particular apparatus) or does not transform the underlying subject matter (such as an article or materials) to a different state or thing. See MPEP §2106.IV.B: *Determine Whether the Claimed Invention Falls Within An Enumerated Statutory Category*. See also the following U.S. Supreme Court cases: *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); and *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

Regarding claims 115-117, the claims do not appear to satisfy or to be within any of the statutory classes of invention, namely a useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof. Thus, the claims do not tied with a computer system for performing any functions.

Based on the 101 and 112, second paragraph, the claims do not fall within any of the statutory classes of invention and appears to vastly differ from the other claims as the scope of these claims cannot be positively ascertained.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claims 1-117 are rejected under 35 U.S.C. 102(e) as being anticipated by Hart (Patent No. 7,048,185).

Regarding claim 1, Hart discloses a system for tracking and recording equipment information. In so doing, Hart discloses a service data device configured for displaying at least one data screen including at least one checklist configured for operative use in connection with performance of said service operation on said inspected item, said data device being portable and being configured for processing at least one communication (col. 13, lines 19-50); a service administrator (i.e., a tracking system. Note figure 4) having at least one data storage medium configured for storing at least one of said checklists displayed on said data device (col. 5 line 45 through col. 6 line 17), said service administrator further having at least one server for enabling at least one communication between said service administrator and said data; at least a portion of at least one of said checklists being customizable by at least said service administrator (i.e.

depending on the item serviced or equipment tracked, there must be a specific customized checklist for the specific or item serviced because different types of item serviced or equipment tracked require different types of services) and, at least a portion of at least one of said checklists being electronically interactive in association with performance of said service operation on said inspected item (col. 5 line 45 through col. 6 line 17).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Manegold (u.s. Patent No. 6,671,646) discloses a portable device for use in recording data related to safety inspection.

b. Casey et al (U.S. Patent No. 6,513,045) provides an automated cross-product process for creating and updating phases of an IS system.
